# Junyu Zhang

☑ junyuz6@illinois.edu | 🗘 jyzhang1208 | 🝱 Homepage | 🔊 Google Scholar

#### **EDUCATION**

# **University of Illinois Urbana-Champaign**

Illinois, US

M.S. in Computer Science (Research Track), Siebel Scholar (Class of 2026)

Aug 2024 - May 2026

o **GPA: 4.0**/4.0

o Research Advisor: Prof. Huan Zhang

# **Huazhong University of Science and Technology**

Hubei, China

B.E. in Artificial Intelligence, Honor Class of Artificial Intelligence

Sept 2020 - June 2024

o GPA: 3.89/4; Rank: 1/29 (selected from 360 students in the school)

• English Proficiency: TOEFL 105 (Speaking 24); GRE 325+3.5 (Verbal 156, Quantitative 169)

## RESEARCH INTERESTS

In the era of large-scale foundation models, my research goal is to incentivize the capabilities of pretrained models by empowering them to perform long-term reasoning and learn from interaction, thereby building scalable and generalizable AI for the open world.

- Large Language Models Reasoning: efficient and theoretically grounded reasoning; embodied spatial reasoning for agentic decision-making; mathematical reasoning with scalable evaluation.
- Learning from Interactions: empirical reinforcement learning algorithms and their applications in robotics, including morphology-behavior co-optimization and robotic manipulation.

## PUBLICATIONS AND PREPRINTS

- 1. **Junyu Zhang\***, Yifan Sun\*, Tianang Leng\*, Jingyan Shen\*, Ziyin Liu<sup>†</sup>, Paul Pu Liang<sup>†</sup>, Huan Zhang<sup>†</sup>, "When Reasoning Meets Its Laws", Under review
- 2. **Junyu Zhang\***, Runpei Dong\*, Han Wang, Xuying Ning, Haoran Geng, Peihao Li, Xialin He, Yutong Bai, Jitendra Malik, Saurabh Gupta, Huan Zhang, "AlphaOne: Reasoning Models Thinking Slow and Fast at Test Time", in EMNLP 2025 Main [PDF] [Website]

#### HONORS AND AWARDS

- Siebel Scholar Award (top 1%) 2025
- Outstanding Graduate Honor 2024
- Outstanding Undergraduate Student Award (top 1%) 2022
- Excellent Academic Scholarship 2021
- Science and Technology Innovation Scholarship 2022, 2023
- The Second Prize of the World Robot Contest-BCI Brain Control Robot Contest 2021
- Honorable Mention in Mathematical Contest in Modeling 2022

#### RESEARCH EXPERIENCE

## Research Intern - MIT Media Lab

Massachusetts, US

Supervisor: Prof. Paul Pu Liang

June 2025 - Present

## **Physics of Large Language Models Reasoning**

- o Developed a unified framework that formalizes intrinsic LRM reasoning via two fundamental laws.
- o Introduced LoRe-Bench to evaluate whether current LRMs follow the laws, and proposed a simple yet effective fine-tuning approach that empirically validated our theory.
- o Our project is submitted to ICLR 2026.

# Research Assistant - Assured and Trustworthy AI Research Lab

Illinois, US

Supervisor: Prof. Huan Zhang

Aug 2024 - Present

## Dynamic Benchmark for Mathematical Reasoning in Vision-Language Models

- Investigated the mathematical reasoning robustness and revealed limitations of SOTA VLMs.
- Proposed a dynamic benchmark capable of generating a large number of question variants and conducted an extensive evaluation of both closed-source and open-source VLMs.
- o Our work is accepted by ICLR 2025.

#### Vision-Driven Embodied Agent Benchmark of Multi-modal Large Language Models

- Developed a standardized, multifaceted evaluation platform for automatically quantifying the performance of task planning in MLLM-based embodied agents.
- Created capability-oriented task datasets from high-level rearrangement to low-level manipulation and performed extensive experimental evaluations to further understand MLLM-based planning.
- o Our work is accepted by ICML 2025.

# **Test-Time Scaling of Large Reasoning Models**

- Introduced a universal framework for modulating reasoning progress in LRMs at test time.
- Unified and generalized existing monotonic scaling methods by enabling flexible and dense slow-tofast reasoning modulation, demonstrating superior reasoning capability and efficiency.
- o Our work is accepted by EMNLP 2025 Main.

## **Visual Preference Optimization (in progress)**

- Proposed a learning framework that applies explicit, dense supervision to LVLMs by jointly optimizing both visual prior and language posterior representations.
- Distilled knowledge from contextualized to non-contextualized vision language models to enhance their alignment and performance.

# Research Intern - MIT-IBM Watson AI Lab

Massachusetts, US (remote)

Supervisor: Prof. Chuang Gan

April 2023 - Mar 2024

**Sequential Decision Making for Robotic Manipulation** 

- Proposed a novel framework that enabled efficient policy generalization in the offline multi-task and imitation learning settings.
- Incorporated mixture of experts layers into the transformer model that effectively harnesses the commonalities and discriminations of multimodal data.
- o Evaluated our method on the RLBench benchmark that demonstrated great generalization ability.

# Research Intern - IIIS, Tsinghua University

Beijing, China

Supervisor: Prof. Chongjie Zhang

July 2022 - Jan 2024

#### **Offline Meta Reinforcement Learning**

- Revealed theoretical insights for offline meta-RL with online adaptation.
- Generated in-distribution context using a given uncertainty quantification and performed effective task belief inference to address new tasks.
- o Our work is accepted by ICML 2023.

#### **Robot Design via Reinforcement Learning**

- Designed robots with various functionalities in simulated environments by using symmetry to exploit the structure of the robot design space with symmetry.
- Proposed a novel plug-and-play transformation module to map any robot design into a learned symmetry space and provided theoretical analysis to verify its rationality.
- o Our work is accepted by ICML 2023.

## Multi-cellular Soft Robot Design

- Inspired from real multi-cellular organisms and developed a novel algorithm to co-design soft robots in behavior and morphology.
- Introduced coarse-to-fine robot design strategy and conducted a comprehensive analysis of its benefits in the evolution of intelligent collectives
- o Our project is accepted by ICLR 2024.

#### SPEAKING ENGAGEMENTS

AlphaOne: Reasoning Models Thinking Slow and Fast at Test Time

o Invited talk at NVIDIA AI Reasoning Team - Aug 2025

Unlocking Reasoning in Foundation Models

o Invited talk at Multisensory Intelligence Group, MIT Media Lab - Aug 2025

#### ACADEMIC SERVICE

#### **Conference Reviewer**

- o International Conference on Learning Representations (ICLR) 2025, 2026
- o Conference on Neural Information Processing Systems (NeurIPS) 2025
- o ACL Rolling Review (ACL ARR) 2025

#### TEACHING EXPERIENCE

#### **Teaching Assistant**

- ECE598-Advanced Topics in Machine Learning and Formal Methods, University of Illinois Urbana-Champaign *Fall 2024*.
- o CS441-Applied Machine Learning, University of Illinois Urbana-Champaign Spring 2025.
- o CS107-Data Science Discovery, University of Illinois Urbana-Champaign Fall 2025.

# SKILLS SUMMARY

- Programming Languages Python, C/C++, Matlab, SQL, Bash
- Languages Chinese, English
- Frameworks PyTorch, TensorFlow, Keras, OpenCV, Scikit, etc.
- Tools PyCharm, VS Code, Markdown, Jupyter Notebook, Mobaxterm, Kubernetes, Git
